The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination, fails to anticipate or render obvious, the method, including the limitations of forming a first oxide film on the storage electrode; subjecting the first oxide film to a thermal treatment in an atmosphere comprising an n-type impurity to implant the impurity into the first oxide film; forming a nitride film on the first oxide film, whereby the impurity in the first oxide film is diffused into the nitride film; forming a second oxide film on the nitride film; and forming a plate electrode on the second oxide film.
